

Travelling Through Airports

Mollie created the following notice based on a phone call that Bobby received from a highly reputable person. Their public affairs office did not want us to disclose names; however, they felt the need to contact us so we can tell our members since it looks like a lot of CHL holders are the culprits.

They approved the announcement that Mollie came up with.

News You Can Use

Traveling with firearms through airports requires special care. The **TSA's** Firearms & Ammunition section states "Travelers may only transport **unloaded** firearms in a locked, hard-sided container as checked baggage. The container must be completely secured from being accessed. All firearms, ammunition and firearm parts, including firearm frames, receivers, clips and magazines are prohibited in carry-on baggage."

Before you fly, please go to <http://www.tsa.gov/traveler-information/firearms-and-ammunition> for additional guidelines.
